## FEATURES & BENEFITS

- **Large ice production in standard 30 inch wide footprint:** This common width design fits on most 30 inch wide ice bins and produces up to 263 kg (521 lb) of clear ice per day
- **Optimized storage capacity:** Stores up to 213 kg (470 lb) of ice in the insulated ice bin
- **Clear ice with less impurities:** Vertical evaporator with water flow design uses gravity to remove impurities during the freezing process, producing clear and great tasting ice
- **Advanced digital programmable control system:** Easy to use with precise control over settings and feedback on the status of the machine
- **Automatic self-cleaning function for use with nickel-safe cleaning solution:** Ensures hygiene and reduces maintenance effort, safe for all components
- **Automatic shut-off and overflow protection:** Experience worry-free operation with this standard feature
- **Internal LED light in the storage bin:** Increase visibility inside the bin, making it easier to monitor ice levels and access ice even in low-light conditions
- **Stackable design for expanded ice production needs:** Stack 2 units on top of each other on the same ice bin; provides the flexibility to scale up your ice-making capacity as needed, making it an ideal solution for growing businesses (requires stacking kit sold separately)
- **15.24 cm (6 in) adjustable leveling legs:** Allow for easy leveling on uneven surfaces, ensuring stability and optimal performance while also making it easy to clean under the machine
