600LB MODULAR ICE MAKER – 30IN WIDTH

FEATURES & BENEFITS

- Large ice production in standard 30 inch wide footprint:** This common width design fits on most 30 inch wide ice bins and produces up to 295 kg (650 lb) of clear ice per day
- Clear ice with less impurities:** Vertical evaporator with water flow design uses gravity to remove impurities during the freezing process, producing clear and great tasting ice
- Advanced digital programmable control system:** Easy to use with precise control over settings and feedback on the status of the machine
- Automatic self-cleaning function for use with nickel-safe cleaning solution:** Ensures hygiene and reduces maintenance effort, safe for all components
- Automatic shut-off and overflow protection:** Experience worry-free operation with this standard feature
- Internal LED light in the storage bin:** When combined with the matching ice storage bin NIB580 (sold separately); increase visibility inside the bin, making it easier to monitor ice levels and access ice even in low-light conditions
- Stackable design for expanded ice production needs:** Stack 2 units on top of each other on the same ice bin; provides the flexibility to scale up your ice-making capacity as needed, making it an ideal solution for growing businesses (requires stacking kit sold separately)
